

Pesticide Rapid Test

With more than 800 pesticides currently in use there is growing concern about the effect of pesticide exposure on human health. As a result, the residue level of pesticides in vegetables and fruits are highly regulated.

While analytical techniques like GC, GC/MS and LC/MS/MS have traditionally been used for pesticide analysis, Bioeasy's

industry leading rapid test with high sensitivity and accuracy has quickly become the technique of choice due to the ability to do a super-fast analysis and much less sample preparation.

Pesticide Rapid Test

High sensitivity and good accuracy
Good control of false positive rate, great conformity with HPLC-MS/MS

Complete ranges of product line
Including Organophosphorus, organochlorine, amino acid ester, pyrethroid and also the fungicide

Wide ranges of applications
Applicable for high pigment content samples like, chili, tomato; and also applicable for samples with secondary metabolite, such as scallion and garlic.

Fast
Only a few minutes to read the results

OPTIONAL DEVICES

DESKTOP READER

- Ease of use with 6.2 inch touch screen and smart operation system
- Compact design, ideal solutions for Lab used
- High-sensitivity measurement with high repeatability
- Build-in Micro-Thermo printer
- Large built-in memory can save 9,990 measurement records
- Fast response time, results tested within seconds

SAFF READER

- Hand-held designed with battery, good for on-site application
- USB port connection or car cigarette-lighter power driven, ideal solution for farmer and truck driver.
- Ease of use with 3.5 inch touch screen
- Data storage can be up to 9,000

POCKET READER

- Use to read Bioeasy Strips
- Connected with Bluetooth
- Available with Android Application
- Data can be Saved and extracted from Android mobile

PIPETTES

- 20-200 μ L
- Digital display clearly reads volume setting
