MILK SAFETY

Antibiotic residues in milk are a concern to human health as residues can promote antibiotic resistance in pathogenic bacteria and cause allergy and hypersensitivity in human beings.

We are serving dairy farmers and plants in the global market, protecting their milk safety locally. And help to expand their business globally.

Bioeasy dairy kits were selected in India to conduct National Milk Safety and Quality Survey 2018.

Bioeasy test kits have been approved by various certification and validation agencies across the globe.
